DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 and 12-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art teaches a thin film transistor array wherein the drain electrode of a transistor is coupled to the data line, a scanning line is coupled to a gate electrode of the transistor and crossing the data line to form a matrix of pixels; a pixel electrode electrically connected to the source electrode of the transistor and an auxiliary electrode is formed on an edge of the pixel electrode. The prior art does not teach the above prior art in combination with the auxiliary electrode having a direct electrical connection with the pixel electrode and being formed on the edge of the pixel electrode and where the edge is parallel to the data line. This combination has been found to be non-obvious thus novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
